Proposal 1: Charles Greenway

1. Organisation Overview

Charles Greenway is a gardening and landscaping service that prides itself in providing beautiful, clean and healthy gardens for residential and business customers. The service covers tasks like lawn mowing, bush trimming, plant watering, weed removal, pest control, and other gardening duties. (Charles, 2023)

This business is a service-based business. This means that the employees drive to customers' homes or business premises as opposed to a customer coming to a shop. The business was set up to help those who do not have the time, equipment or knowledge to perform tasks to ensure that their garden is clean, healthy and well maintained. (Charles, 2023)

The objective of the organization is to look after the environment and improve the look and cleanliness of outdoor spaces. A well-kept garden improves the overall health of plant life and has benefits for outdoor areas (Royal Horticultural Society 2024). Charles Greenway looks to deliver reliable, professional gardening services that customers can rely on. (Charles, 2023) (National Association of Landscape Professionals, 2024)

Target Market includes:

- Homeowners
- Office parks
- Restaurants and cafes
- Schools
- Small businesses
- Elderly people looking for assistance with gardening.

The business aims to be the local gardening service brand that is trusted in its reliability and price and its concern for the environment. (Charles, 2023)

2. Website Goals and objectives

The main objective of the website is marketing the business and gaining more customers. The site will give detailed information regarding services and will enable customers to inquire online. (Network Solutions, 2024)

Objectives include creating awareness among customers, making service inquiries, and showing the services and their prices. (Kawasaki Engines, 2024)

.

#	Objective	Description
1	Brand Awareness	Establish an online presence that promotes the Charles Greenway brand to potential customers in the local area.
2	Service Promotion	Clearly showcase all services offered, including descriptions and pricing, so visitors understand the full scope of the business.
3	Lead Generation	Enable potential customers to submit enquiries directly through the website, generating leads for the business.
4	Trust Building	Provide credible business information, contact details, and professional presentation to build customer confidence.
5	Accessibility	Ensure the website is accessible and user-friendly across all devices like desktop, tablet, and mobile.

Key Performance Indicators (KPI) measures include the number of visitors to the website, number of inquiries made, and growth in the number of customers

3. Proposed Website Features and Functionality

3.1 Homepage ([index.html](#))

Objective: First point of contact and providing a strong first impression for all visitors, leading them to the most appropriate sections of the site. (iStock, 2024)

Contents and Features:

- A full-width hero banner containing a high-quality picture of the garden and a concise header (e.g., 'Your Garden, Our Passion').
- Call-to-action button leading to the enquiry page.
- A short company introduction paragraph, with the layout divided by DIV containers.
- Services Highlights section – icons representing the three services.
- Navigation bar leading to all pages (sticky on scroll).
- Footer with contact information, social links and copyright notice.

3.2 About Page ([about.html](#))

Objective: Giving a history of the business and describing its mission, values and the team.

Contents and Features:

- History of the company and founder.
- Statement about the company's mission and values.
- Team profile – name, role and brief biography.
- DIV-based layout (two-column – image on the left, text on the right)
- Client testimonials or quotations section.

3.3 Services Page ([services.html](#))

Objective: To present all the services and their prices, allowing customers to decide which are best for them.

Contents and Features:

- Detailed service description (lawn mowing, trimming, pest control, etc.).
- Price list showing basic, standard and premium services.
- DIV-based layout for services, using grid design – service name, image, description.
- Book Now CTA linking to the enquiry page.
- Frequently asked questions accordion section.

3.4 Enquiry Page ([enquiry.html](#))

Objective: To enable potential customers to submit enquiries and get a quote online.

Contents and Features:

- HTML form including fields for Full Name, Email Address, Telephone Number, Services Required (using a dropdown menu), Preferred Date, Message Details.
- JavaScript client-side validation for all mandatory fields and email format.
- Success message following submission of the form.
- DIV-based layout for the form (clear labels and style for input fields).
- Embedded Google map of service area.

3.5 Contact Page ([contact.html](#))

Objective: To list all of Charles Greenway's contact details.

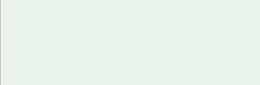

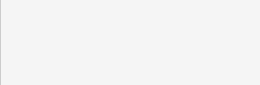

Contents and Features:

- Contact details (address, phone number and email address).
- Operating hours in table form.
- Embedded Google map indicating the area served by Charles Greenway.
- Links to social media pages (Facebook, Instagram, WhatsApp).
- Optional brief enquiry form.

4. Design and User Experience

The site will have a green and white colour theme that features nature and sustainability. Fonts that are easy to read will be used. The design will be minimalistic and friendly to users.

Colour Template

Colours	Colour Names & Hex	Usage
	Primary Green #2D6A2D	Headings, buttons, key highlights
	Accent Green #4CAF50	Hover states, icons, links
	Light Green #E8F5E9	Section backgrounds, alternating rows
	White #FFFFFF	Page background, card backgrounds
	Dark Charcoal #1A1A1A	Body text, paragraphs
	Medium Grey #777777	Captions, secondary text, footers
	Light Grey #F5F5F5	Input field backgrounds, dividers

(OpenAI, 2024)

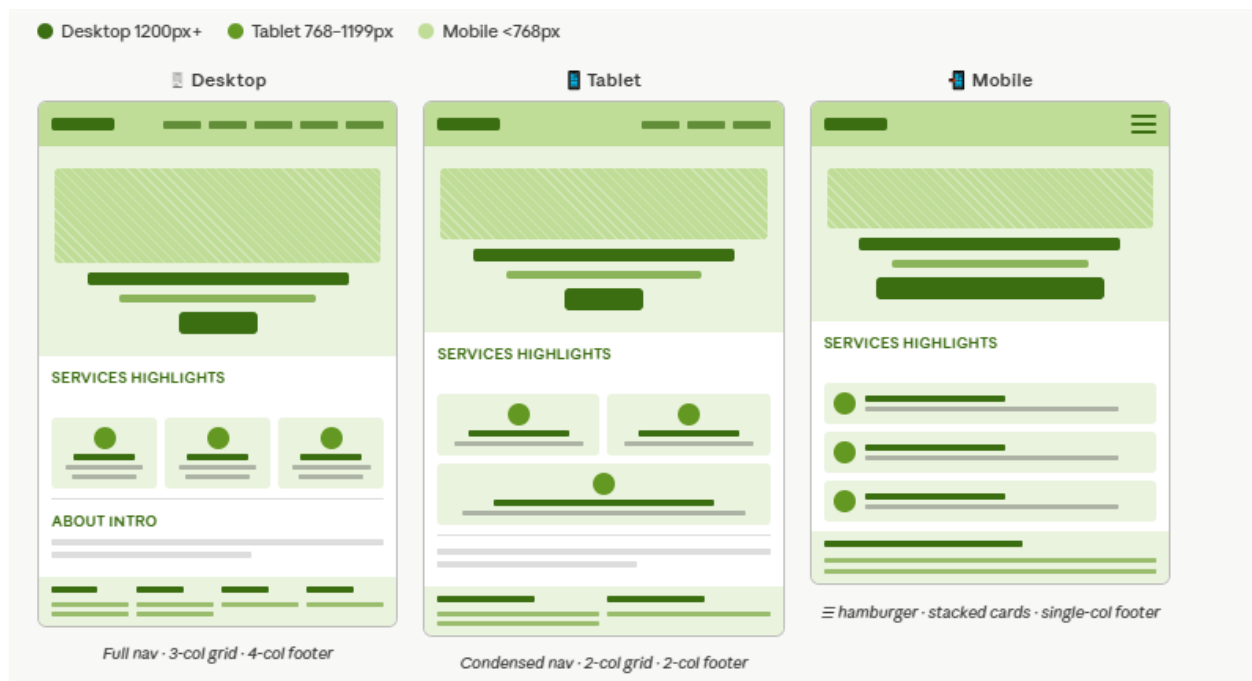

Typography

Use Playfair Display for the hero display, page titles and large headings. For this typography, use 36px-52px to give it a stronger and more professional look.

Main font to use for body will be Lato (Regular and Bold). Use 14px-24px for body text, navigation links, buttons and image captions, because it's clean, modern and very readable.

Also use Lato Bold for subheadings and section titles. Use 18px-28px and apply on H2/H3 and service cards, sections of relevant content. (OpenAI, 2024)

Wireframe

(Anthropic, 2026)

5. Technical Requirements

Infrastructure & Hosting

The website will be developed using:

- HTML5
- CSS3
- JavaScript
- Visual Studio Code
- GitHub for version control

The website will be hosted using a domain and web hosting provider.

Hosting Requirements:

- Reliable uptime
- Sufficient storage space
- Secure HTTPS connection
- Domain registration
- Backup support

Performance & Accessibility

The website will be optimised for performance and accessibility by:

- Compressing images for faster loading
- Using responsive design for mobile devices
- Using readable font sizes
- Including alternative text for images
- Creating keyboard-friendly navigation
- Maintaining consistent spacing and layouts

(W3C, 2023)

Security & Compliance

- The website will follow basic security practices such as:
- Secure contact forms
- HTTPS encryption
- Spam protection on forms
- Protection of customer information
- Compliance with POPIA regulations in South Africa

(Da Veiga et al., 2024)

Functional Integrations

The website may include:

- Google Maps integration
- Email contact forms
- Social media links
- WhatsApp contact button
- Future online booking integration

Ongoing Maintenance

- Regular maintenance activities will include:
- Updating content and pricing
- Fixing broken links
- Improving website speed
- Performing security checks
- Updating images and service information
- Monitoring customer feedback

6. Timeline and Budget

Timeline

Week	Task	Description
Week 1	Project Planning	Create proposals and get approval
Week 2	Content Collection	Gather images, text, and resources
Week 3	Sitemap & Structure	Create sitemap and organise folders
Week 4	HTML Setup	Create basic HTML files (index, about, services, enquiry, contact)
Week 5	Page Structure	Add headings, paragraphs, images to each page
Week 6	Page Structure	Create and test navigation menu linking all pages
Week 7	CSS Styling	Add colours, fonts, layout, and design
Week 8	Advanced Styling	Improve layout, spacing, responsiveness
Week 9	Forms	Create enquiry/contact forms
Week 10	Testing	Test all pages, fix errors and broken links
Week 11	Final Touches	Improve design and user experience
Week 12	Deployment	Upload to GitHub and submit

Budget

Item	Cost
Domain Name	R150
Hosting (monthly x 12)	R1200
Images (stock/free)	R0
Development (self)	R0
Marketing (social media ads)	R300
Transport (business ops)	R500
Total Estimated Cost	R2150
